5. Jeff was counting the amount of money in a bag of dimes.

**“10¢, 20¢, 30¢, 40¢, . . .”**

As he was counting, Jeff noticed the numbers he was saying were all even. Do you think the number of cents will always be even?

- A. No, because the pattern may change.
  - B. No, because it only works with coins less than a dollar.
  - C. Yes, because the number of coins is always even and even times even is even.
  - D. Yes, because when you add 10 to an even number the sum is always even.
